What this means

Your site was up the whole month with no outages, and it loaded a little faster than October. Your certificates are in good shape until mid-January. Email protection, your domain renewal date, and your Google listing all look good.

What changed since last month

Uptime was 100%, up from 99.866% in October, when there was one short outage.
Average homepage response was 618 ms, 34 ms faster than October.
This month had no incidents, 1 fewer than October.
Both certificates stayed valid all month and are good until January 14, 2027.
No significant homepage content changes were recorded.

One tip this month

Your certificates renew in mid-January. Most hosts renew them automatically, but if yours doesn't, we'll warn you around December 24, 2026, three weeks ahead.
